Joseph de Pancier
Chef Executive Officer of
Institute of Anti-Doping Organization

Dear Mr. de Pancier,

The results of McLaren investigation are one of the biggest doping scandal in history of the modern sport. For Ukraine on its way to the European Community is extremely important to fight for clean sport and developing basis for absolutely transparent anti-doping programs.

Hence National Anti-Doping Center fully support all proposals were made by leaders of Anti-Doping community, namely:

- exclusion of Russian sports organizations at all international competitions – with a uniform process for athletes to compete as neutrals until substantive progress in reform efforts are made;
- removal of all major international competitions, as well a moratorium on the awarding of new competitions to Russia;
- endorse WADA as global regulator and offer support for ongoing reform efforts;
- reject concept of a new one size fits all, global “Independent Testing Authority” controlled by sport and consider guidelines for development of independent testing authorities to manage anti-doping responsibilities formerly conducted by International Federations (IFs).

We would like to assure you that National Anti-Doping Center will support all actions aimed at fight against doping.

Best regards,

Yaroslav Kruchek,
Deputy Director of NADC
